

CIFP

Closures & Incidents Feed

Script and WebApp for managing WME closures CIFP feed

**A short guide to using
the WME script and
the Management WebApp**

Part #1 - The WME Script

The CIFP script

Purpose: To insert closures into a database to be sent to Waze via JSON Feed.

NOTE: The use of CIFP must be authorized, so the script requires an API key to be used. If you do not have one, ask your country manager who, at his discretion, will generate one.

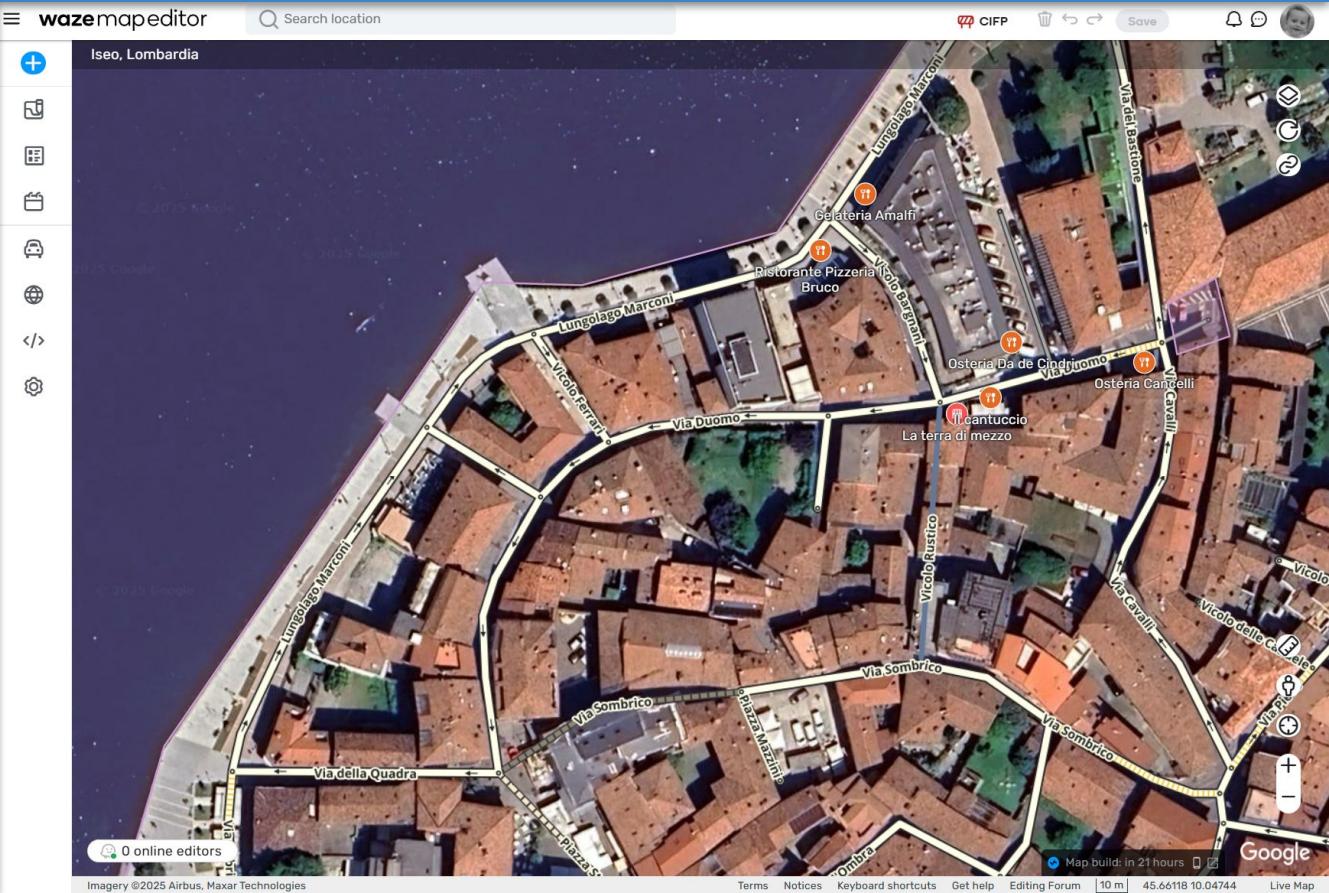

Installation

- Make sure you have the “TamperMonkey” extension installed by downloading it from here: <https://www.tampermonkey.net/>
- Download the script from the Waze.Tools CODE site by following this link: <https://code.waze.tools/home/browse.jsp?ShowSID=9ef6797a-6358-4b31-8147-511099e3419f>
- TamperMonkey will ask you to install the script, accept
- Once WME is launched an additional icon called “CIFP” will appear at the top

How to use the script

- Follow the instructions in the previous slide for installation
- If everything went well, you will have a new button labeled **CIFP** in your WME
- If the button does not appear, refer to the last slide of this section to enable debugging and generate useful information to solve the problem

How to use the script

- Select the segments that should be closed
- Multiple segments can be selected by holding down the CTRL key while clicking on the desired segment
- You can only select objects of type “segment”, other object types are not supported.

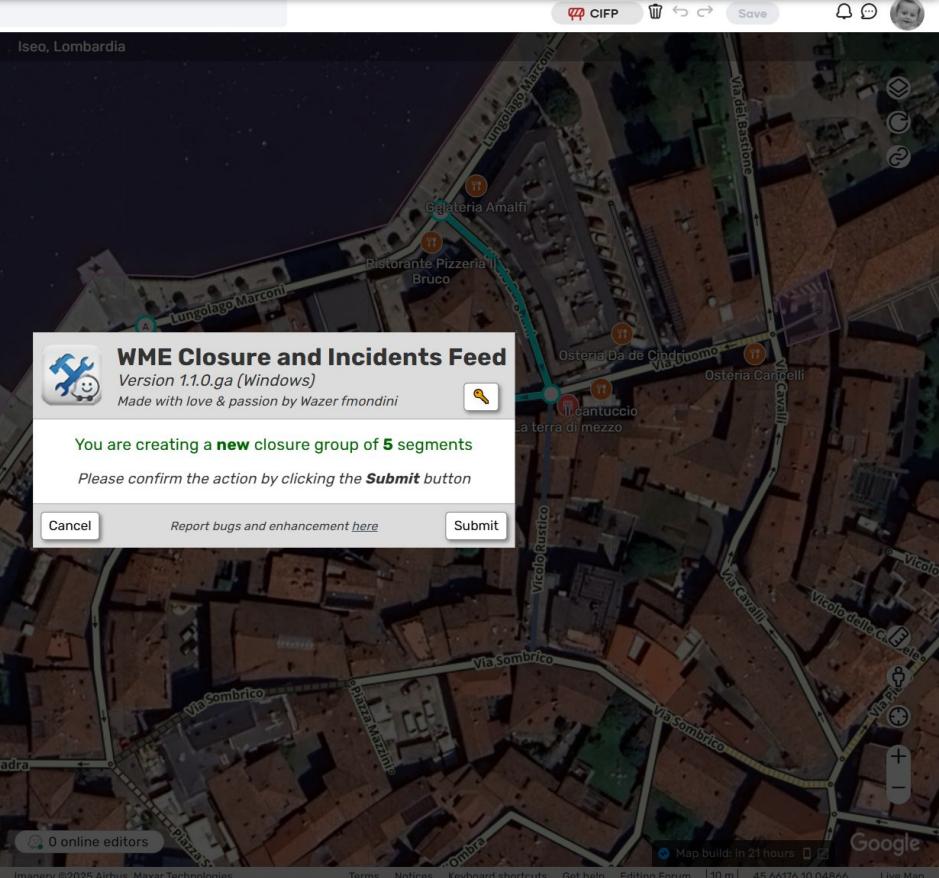

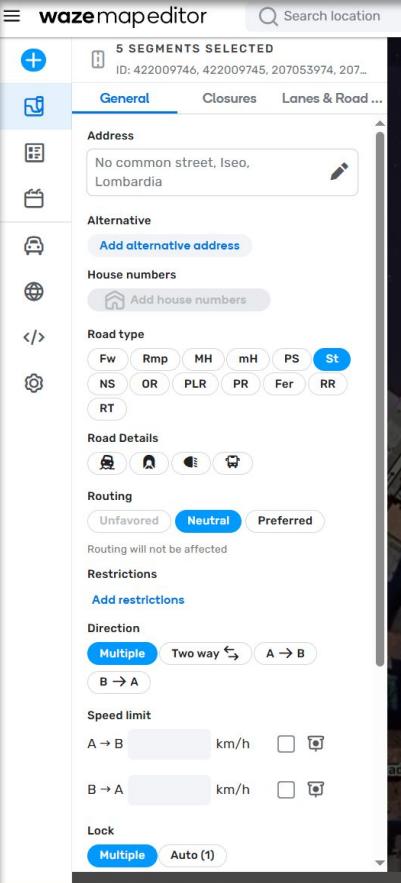

The screenshot shows the Waze Map Editor interface with the following details:

- Left Panel (Toolbars and Settings):**
 - Top bar: waze map editor, Search location, CIPP, Save, Notifications, Keyboard shortcuts, Get help, Editing Forum, 10 m, 45.6613110.04855, Live Map.
 - Left sidebar icons: +, Segment selection, General (selected), Closures, Lanes & Road ...
 - Address input: No common street, Iseo, Lombardia.
 - Alternative: Add alternative address.
 - House numbers: Add house numbers.
 - Road type buttons: Fw, Rmp, MH, mH, PS, St, NS, OR, PLR, PR, Fer, RR, RT.
 - Road Details buttons: Car, Bus, Train, Boat.
 - Routing buttons: Unfavored, Neutral (selected), Preferred.
 - Restrictions: Add restrictions.
 - Direction buttons: Multiple (selected), Two way, A → B, B → A.
 - Speed limit: A → B and B → A fields with km/h and checkboxes.
 - Lock: Multiple (selected), Auto (1).
- Right Panel (Map View):**
 - Map view of Iseo, Lombardia showing a satellite-style map.
 - A cyan line highlights a closed loop of segments, indicating the path selected for closure.
 - Labels on the map include: Lungolago Marconi, Gelateria Amalfi, Ristorante Pizzeria Bruco, Osteria Da de Cindromo, Osteria Cancelli, Leantuccio, La terra di mezzo, Vicolo Rustico, Vicolo Cavalli, Vicolo della C. G. L., Vicolo delle G. L., Via Sombrico, Borgo Maggiore, Piazza Ombra, and Via P... .
 - Bottom status bar: Imagery ©2025 Airbus, Maxar Technologies, Terms, Notices, Keyboard shortcuts, Get help, Editing Forum, 10 m, 45.6613110.04855, Live Map.

How to use the script

- After selection, click on the CIFP button
- A window like the one on the side will appear
- If this is your first time using CIFP click on the button with the key  to enter your API key
- Check that the number of segments matches the number of segments to close
- Submit the form

How to use the script

- Wait a couple of seconds while the Waze.Tools CIFP server processes your request
- Once processed, a box will appear containing the result of the operation
- Please note that if the API key is null or invalid, the operation will never be successful

How to use the script

- If the request has been correctly registered, the box you see here on the side will appear
- In the box you will find the ID assigned to this closing group; click on it to enter the details
- You will be transferred to the CIFP WebApp in EDIT mode (see the “Editing an Orphan Closure” slide below)

The screenshot shows the Waze Map Editor interface. On the left, there's a sidebar with various editing tools like 'General', 'Closures', 'Lanes & Road ...', 'Address' (set to 'No common street, Iseo, Lombardia'), 'Alternative', 'House numbers', 'Road type' (selected 'Fw'), 'Road Details', 'Routing' (set to 'Neutral'), 'Restrictions', 'Direction' (set to 'Multiple'), 'Speed limit' (A → B and B → A), and 'Lock' (set to 'Multiple'). At the top, it says '5 SEGMENTS SELECTED' and 'ID: 422009746, 422009745, 207053974, 207...'. On the right, a map of Iseo, Lombardia, shows a closure group highlighted in red. A modal window titled 'WME Closure and Incidents Feed' (Version 1.1.0.ga (Windows)) displays the message 'Closure group has been saved' and the GroupID 'e7f06bf4-306c-4664-af98-43983c9986bf'. It also says 'Click on the GroupID to configure closures directly in the Waze.Tools CIFP WebApp'. The bottom right corner of the map shows 'Map build: in 21 hours'.

How to use the script

- If the entry has not been recorded in the database, the box you see here will appear
- In the box you will find a general explanation of why the insertion was not successful
- In most cases, further information about the error encountered will be available in the browser console (F12)

What to do in case of errors

- In case of error, it might be useful to display some additional messages
- To generate these details, open the script in TamperMonkey and edit the `WCIFP_DEBUG` line, changing the value from “false” to “true”
- The results can be seen from the browser console (F12)

Part #2 - The WebApp

The CIFP Web Application

Purpose: To manage the closures that will generate the feed to be sent to Waze

Entry point

The Web application is available from here: <https://cifp.waze.tools/>

Notes

- To use this application, authorization to use is required
- Authorization to use is given by an admin^(*) and is related to the selected country
- Each user can be authorized for one or more countries

() The admin of a country is usually the country manager or a high-level user selected by the country manager*

Connected as: fmondini

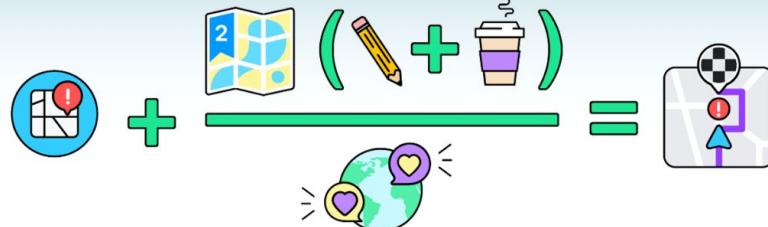

Entry point

- Once connected to the CIFP site, the home page visible here on the right is displayed
- To enter, click on the image
- To be able to log in, you will need your credentials to be enabled for this job
- If not, ask your country administrator

≡ Waze.Tools CIFP

 **Waze.Tools Suite**
by fmondini & the Waze Italian Team

CIFP - Closure and Incident Feed Project

Click on the image above to enter

To log in, you must have a **CIFP-enabled AUTH account**
If you don't have an AUTH account, [register here](#)

If you are already registered but your account is not CIFP-enabled
ask the [Waze coordinator in your country](#) to enable it

This is an unofficial Waze-related site managed by fmondini -- Waze™ is a trademark of GOOGLE LLC
Site hosted for free by [Danisoft Srl](#), Northern Italy - Vat no. IT02914410986 - Datacenter located in [\(see here\)](#)

Authentication

- The CIFP application requires the user to be verified and have the necessary rights to access
- Enter username and password to continue
- Credentials must match those registered in the AUTH webapp and MUST have been enabled for CIFP access by an admin

Queries Home

- Once you enter, you will find yourself on the main page of available queries
- Here are four possible queries:
 - Active Closures
 - Paused Closures
 - Orphan Closures
 - Map of all Closures
- Additionally, you will find the “freshness” of the update from Waze below.

≡ Waze.Tools CIFP

 **Waze.Tools Suite**
by fmondini & the Waze Italian Team

CIFP - Closure and Incident Feed Project

Available queries for your countries

 **Active**
Active Closures
Active closures currently published in the feed (text)

 **Paused**
Paused Closures
Paused closures not present in the feed (text)

 **Orphan**
Orphan Closures
Newly created closures to be activated (text)

 **GMaps**
All Closures
Graphical situation of all closures in the feed (map)

Connection usually occurs every 5 minutes, and it's been 01:37 since the last feed refresh from Waze.
The last GET happened at 13/06/2025 16:18:03 by Anonymous from 34.32.244.65

Active closures

- A closure is considered “active” when it is saved and sent to the JSON feed
- The list displays the closures that are relevant to the user
- Clicking on the description switches to edit mode
- Clicking on “Seg/Str” displays a summary of the roads involved

Incomplete street names

- By clicking on the value of the “Seg/Str” column, the summary of the roads involved in the closure will appear
- If the second digit has a red background it means that some roads have no name, and since Waze does not accept roads without a name the closure cannot be activated

Orphan closures

- A closure is “orphan” when some mandatory fields have not been filled in
- The line has a red background if it does not contain even one segment
- All closures in this status, if not modified by the end of the day, will be treated as an entry error, and deleted at 00:00 GMT

Map view

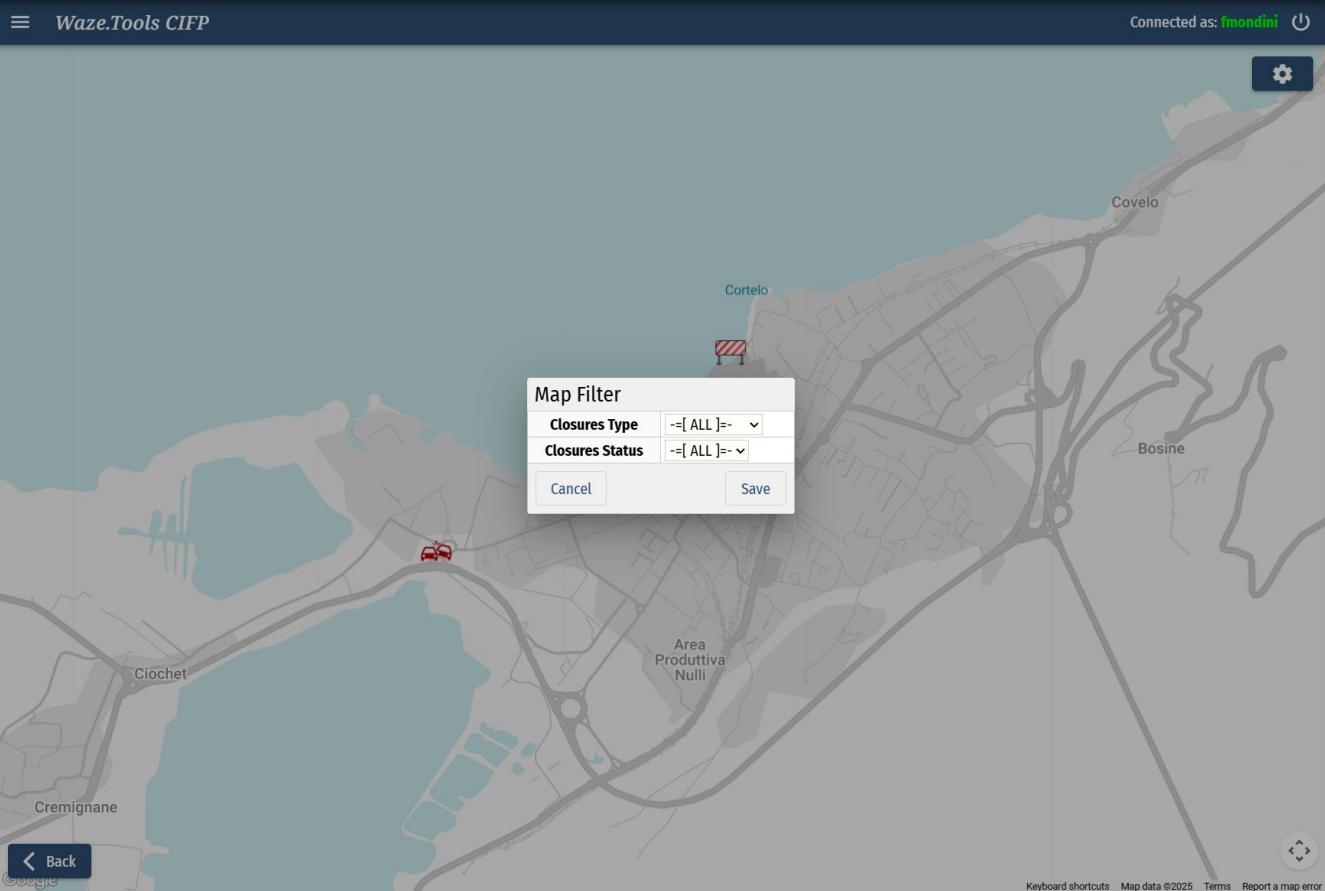

- Closures displayed on the map are identified with a different icon for each closure type
- Icon color meaning:
 - Red: active
 - Gray: paused
 - Yellow: orphaned
- By clicking on a closure icon you will be redirected to the management page for that closure

Map view options

- You can filter the icons based on two parameters:
 - The closure type
 - All
 - Road closed
 - Accident
 - The closure status
 - All
 - Active
 - Paused
 - Orphan

Editing an “orphan” closure

- A newly entered closure is initially in the “orphan” status
- All closures in the “orphan” status, if not modified by the end of the day, will be treated as an entry error, and deleted at 00:00 GMT
- A valid closure must have at least:
 - Description
 - Type & SubType
 - Start & End Date/Time

Enter all the necessary data

- As mentioned in the previous slide, you must enter all the mandatory data
- If the closure is not “continuous” over time but is fragmented into daily periods, also fill in the “Schedule Table”
- Don't forget the flag that indicates what to do with this closure when it expires.

This is an unofficial Waze-related site managed by fmondini -- Waze™ is a trademark of GOOGLE LLC Site hosted for free by Danisoft Srl, Northern Italy - Vat no. IT0291410986 - Datacenter located in (see here)

The left side menu

- By clicking on the “≡” icon at the top left, the application menu will appear
- Here you can find the link to some of the less used functions, such as:
 - Bookmarks
 - Statistics
 - API Documentation
 - General Settings
 - Issue tracker (bugs)
 - Logout

Connected as: fmondini

The screenshot shows the Waze.Tools CIPP interface. On the left is a sidebar menu with the following items:

- Home
- Queries
- Bookmarks
- Statistics
- API Documentation
- Download Script
- Feed Test
- ToDo List
- Settings
- Bugs (Issue Tracker)
- Condizioni d'uso
- About...
- Logout

The main content area has a header "Available queries for your countries" and four sections: "Active" (bell icon), "Paused" (bell with '2' icon), "Orphan" (bell icon), and "All Closures" (GMaps icon). Below these sections is a message about connection frequency and the last refresh time.

About the WebApp

- On this page you can find information about the currently active (online) CIFP version
- It has no purpose, and is only here for the curious ones
- At the bottom you can see graphs of the application status, such as latency to the nearest NAP, current network traffic, and rack temperature

The Issue Tracker

- If you encounter any errors in the application while using CIFP, open a ticket with the GitHub issue tracker
- To use GitHub you will need to have a GitHub account, which can be created for free
- For each new ticket the developers will be notified and, if they are not drunk yet, they will fix it. When? Soon. 😎
